ACTIVITY	QTY	RATE	AMOUNT
Services The technician ran the camera from the side in wall cleanout. Still a lot of old cast iron drains but it is in good condition with no visible cracks. I did notice roots in the line in between 20 feet and 38 feet. I recommend breaking concrete on the side of the house digging down to the drain and adding a ground level cleanout so we can hydro jet all the roots out. Cost for this job would be \$2,500, this includes demo, labor, parts, hydro jetting, and patching concrete.			250.00
Your satisfaction is of highest importance to us. Thank you for the opportunity to serve you.
